

Caleb Perez: PBL Module Background

Characters

- Caleb Perez (32 months old)
- Martin Perez (father)
- Joanna Perez (paternal grandmother)
- Nurse Bailey (treating nurse)
- Dr. Kramer (treating physician)
- Mx. Jackson (social worker)
- Mx. Gonzales (interpreter)

Background Information

Nurse Bailey called for the attending physician, Dr. Kramer, and the hospital social worker, Mx. Jackson. After gathering the initial history from Caleb's father and grandmother, Nurse Bailey advised the hospital staff of the information taken at intake.

Simulation

***Location is the emergency room at a local hospital.** Volunteers playing roles of available characters (see Characters list) have received profiles with character specific information about the scenario and their character's potential reactions. However, they do not have any information about the other characters.

- Nurse Bailey will initiate the simulation by consulting with Dr. Kramer and Mx. Jackson. Nurse Bailey will then introduce the staff to the family.
- Dr. Kramer will listen to the information provided by Martin and Joanna Perez of how Caleb allegedly received the injuries, summarize and ask any clarifying questions.
- All characters are encouraged to look for openings or opportunities to convey pertinent feelings through action, statements or asking pointed questions of others.
- After examining Caleb's injuries and hearing all of the information, Dr. Kramer summarizes their concerns and hospital protocol.
- Characters react to the doctor's statements.
